

Supplementary Table 2. The range of changes in final assessments, calculated as the percentage of number of cases with changed final assessments per total number of cases reviewed by the radiologists

	Sequential (R1)	Simultaneous (R2)	R1 vs. R2 P-value	Experienced vs. Inexperienced P-value
Overall	16.8 (15.4–18.3)	40.8 (38.7–42.8)	<0.001	<0.001
Experienced	16.9 (13.2–16.9)	35.4 (32.8–38.0)	<0.001	
Inexperienced	18.6 (16.6–20.7)	46.2 (43.4–49.0)	<0.001	
BI-RADS 2 or 3 → more than 4a / more than 4a → 2 or 3				
Overall	6.2 (5.2–7.2)	15.8 (13.9–17.7)	<0.001	0.089
Experienced	6.1 (4.9–7.3)	14.8 (12.6–16.9)	<0.001	
Inexperienced	6.2 (4.9–7.5)	16.9 (14.6–19.2)	<0.001	

95% Confidence intervals are given in in parentheses.
